Code Coverage Report

Team 13 | 9 November 2026 | Final verification on main

The source-file hashes are recorded in source-manifest.json. Raw outputs identify the actual environments and execution times.

Backend line coverage

97.36% = 2321 covered / 2384 executable lines. 63 lines were missed. The 80% backend line target passes.

The full branch-enabled suite passed 416 tests with zero failures, errors,

skips or expected failures. Coverage.py reports 96.50% combined

line-and-branch coverage. That combined number is distinct from the line percentage above.

Per-file line measurement

Source file	Covered lines	Executable lines	Line coverage
backend/accounts/__init__.py	0	0	100.00%
backend/accounts/apps.py	4	4	100.00%
backend/accounts/managers.py	16	16	100.00%
backend/accounts/migrations/0001_initial.py	9	9	100.00%
backend/accounts/migrations/__init__.py	0	0	100.00%
backend/accounts/models.py	30	30	100.00%
backend/accounts/permissions.py	18	18	100.00%
backend/accounts/serializers.py	52	52	100.00%
backend/accounts/throttles.py	9	9	100.00%

Method and evidence

Run REQUIRE_DOCKER_TESTS=1 REQUIRE_REDIS_TESTS=1 pytest --cov=backend --cov-branch --cov-report=xml --cov-report=json --junitxml=junit.xml --cov-fail-under=80. Measurement includes backend configuration and migrations as reported by the tool.

Coverage XML, full JUnit XML, console log. XML source paths were made relative to backend for portability without changing measured counts.
